06/10/2025 - 31/03/2026 - NAIROBI, KENYA

IT SUPPORT STAFF & GRAPHIC DESIGNER FERONE CONSULTANCY LIMITED

- Provided day-to-day IT support by troubleshooting computer hardware, software, printer, network, and system-related issues.
- Assisted with computer setup, software installation, email configuration, file management, and user support.

- Supported staff and clients in resolving technical issues quickly and professionally.
- Designed graphics for social media, posters, flyers, branding materials, and digital marketing content.
- Created clean and professional visual materials based on client requirements and brand identity.
- Assisted in preparing digital documents, layouts, and client-facing materials.
- Maintained a practical balance between technical support duties and creative design work.

4LIFE DIGITAL SOLUTIONS / FREELANCE PROJECTS - NAIROBI, KENYA

PROJECT MANAGEMENT INTERN04/03/2025 - 26/09/2025

- Assisted in planning, coordinating, and executing project tasks under the guidance of the project manager.
- Supported the development of project schedules, timelines, and status reports to ensure timely delivery of milestones.
- Monitored project progress and maintained accurate documentation for meetings, updates, and deliverables.
- Collaborated with cross-functional teams to gather requirements, address risks, and resolve project-related issues.
- Participated in team meetings and contributed to the preparation of presentations, reports, and client communications.
- Used project management tools such as Trello, Asana, and Microsoft Project to track tasks, deadlines, and resource allocation.
- Helped maintain compliance with company policies, project standards, and quality assurance processes.

FREELANCE WEB DEVELOPER & DIGITAL DESIGNERCURRENT

- Designed and developed responsive websites for business clients, focusing on clean layouts, mobile responsiveness, usability, and clear call-to-action sections.
- Worked on website restructuring tasks including homepage sections, service pages, contact pages, internal links, redirects, sitemaps, and robots.txt setup.
- Created digital branding materials including posters, flyers, business cards, letterheads, social media graphics, and promotional designs.
- Supported clients with website content structure, service descriptions, marketing copy, and audience-focused messaging.
- Assisted businesses with online visibility through website updates, digital content creation, and social media design.
- Created client-ready documents such as proposals, quotations, company profiles, and branded PDF materials.
- Edited short-form client videos using CapCut, Adobe Ater Effects including service videos, promotional reels, captions, and basic marketing storylines.
- Combined web development, design, and business communication skills to help clients present their services more professionally online.

• CERTIFICATIONS

Moringa School
DevOps Engineering Professional Certification

Afralti
Cybersecurity Training

Moringa School
GitOps & Infrastructure Automation Certification

• CREATIVE WORKS

SecureCommerce Platform Cybersecurity / Full-Stack Project

- Developed or showcased an enterprise-style e-commerce security platform concept focused on AI-powered threat detection, real-time monitoring, and automated incident response.
- Used technologies including TypeScript, React, Node.js, MongoDB, Docker, and AWS.
- Demonstrated knowledge of secure digital systems, full-stack architecture, and cloud-based deployment concepts.

CloudOps Automation DevOps Project

- Worked on an Infrastructure as Code platform concept for automated cloud deployment and management.
- Applied DevOps tools and concepts including Terraform, AWS, Kubernetes, Ansible, and Jenkins.
- Demonstrated understanding of automation, cloud infrastructure, CI/CD, and deployment workflows.

VoteChain System Blockchain Project

- Built or showcased a blockchain-based voting platform focused on transparency, immutability, and voter privacy.
- Applied blockchain development concepts using Solidity, Web3.js, and React.
- Demonstrated knowledge of decentralized applications and secure voting system design.

MalwareAI Detector AI / Cybersecurity Project

- Developed or showcased a malware classification system using machine learning concepts.
- Applied Python, TensorFlow, and Scikit-learn to demonstrate cybersecurity-focused AI skills.

• PROJECTS

Portfolio Website Personal Developer Portfolio

Built with Next.js, TypeScript, Tailwind CSS & Framer Motion

- Designed and developed a personal portfolio website to showcase technical skills, client websites, selected projects, and professional background.
- Presented work in full-stack development, DevOps, cybersecurity, cloud technologies, and client website development.
- Structured the portfolio with sections for projects, websites, skills, education, contact details, and professional positioning.
- Used the portfolio to demonstrate practical experience in responsive design, modern UI layout, web deployment, and personal branding.
